CUES® Partners with LEO Cyber Security to Bring Complete Cybersecurity & Compliance to its Members

MADISON, Wis.—CUES is pleased to announce its partnership with LEO Cyber Security, a Texas-based cyber-advisory and operations firm that helps businesses architect, build, and operate cybersecurity programs.

Staffing a cybersecurity program is expensive and requires ongoing development to ensure staff members are up-to-date. Even with the high levels of investment, it's hard to know if you're really protected. LEO Cyber Security specializes in maturing security programs through leadership, cyber operations, incident response, and compliance.

As the premier provider of cybersecurity services and solutions to credit unions, LEO helps organizations build and manage reliable security programs through creative solutions.

"We are looking forward to bringing LEO Cyber Security's expertise to our members," said CUES President/CEO, John Pembroke. "Cybersecurity is an ever-growing concern within the industry, and LEO's operational knowledge will help our members build a strong a sustainable system for their organization."

LEO focuses on emerging growth markets, like credit unions, with deep needs for cyber security operations and regulatory compliance expertise.

"Partnering with CUES allows us to bring our cybersecurity expertise to the greater credit union industry," said David Tompkins, Founder, LEO Cyber Security. "We're excited to provide CUES member credit unions with creative, custom solutions to help them build and manage their security programs. LEO hires world-class cyber operators to help their customer's build effective and efficient cybersecurity programs. We're here to help take the industry into the digital future."
